

Basic Sustainability Policy

The SAKAI Group aims to contribute to a sustainable society, the Group's sustainable growth and medium- to long-term increase in corporate value through implementation of ESG management based on our basic management policies of contributing to the social business of global land development through the road construction

1. Environment

Together with our initiatives to reduce our own CO2 emissions we contribute to a decarbonized society through the creation of added value by developing new technologies.

2. Society

We engage in resolving social issues and creating social value through our road construction equipment business.

3. Human rights

We do not discriminate based on personal attributes such as gender, nationality or age and we respect the human rights of all stakeholders involved in our business activities.

4. Human resources

Human resources are the driving force behind corporate development and we prepare a safe and secure work environment while recognizing diversity and we strive to secure and train human resources.

5. Corporate governance

We strive to build a relationship of trust with all stakeholders, promoting the creation of a management structure based on the Corporate Governance Code.
